Forex SAMURAI Robot

EURUSD, H1

User's Manual

Few words about **Forex Samurai Robot**

I bring to your attention a brand new, outstanding product. It is designed for 100% automated trading. This is a **Forex SAMURAI Robot**. Why should you rely on this robot?

Primarily, this is a completely new type of robots, which can analyze the market and change their algorithm during trading. Going a bit further into the details - this means that the robot collects market data, analyzes and trade better. The longer you use this robot - the better the results you can get. Also, you need to have a stable internet connection - **Forex SAMURAI Robot** trades 24 hours a day, 5 days a week.

How exactly it works

It receives data on trading activity of the previous week, analyze market quotes, all transactions and findings support and resistance levels, and check number of other useful information.

Based on this, it creates a new, improved trading strategy on the actual week. If you have a stable internet connection - the robot trades without power and internet errors. This will improve the results with each new week.

Normally, Samurai opens 1 orders a day, but sometimes even rarely – 1 order in 1-3 days. It depends on Market situation. Just allow it to trade. Last month we got 17 orders only, but 14 were profit ones.

Installation and Setup

Installation and Setup (previous versions):

Forex Samurai Robot is requires MetaTrader 4 to function. It works with 4 and 5 digits brokers. If you don't have MT4 on your PC – you can get it easy from ANY broker. It's 100% FREE as well as DEMO account there.

There are many brokers nowadays, but here some examples for you too. See below:

FxPro: <http://fxpro.com>

Alpari UK: <http://alpari.co.uk>

If you already have MetaTrader 4 installed, place the following files: **Forex_Samurai_Robot.ex4** into C:/Program Files/**xxxxxx**/experts, where **xxxxxx** is the name of your MT4.

For example, the MT4 from FxPro is called **FxPro - MetaTrader**, and the complete path will look like this: C:/Program Files/FxPro - MetaTrader/experts.

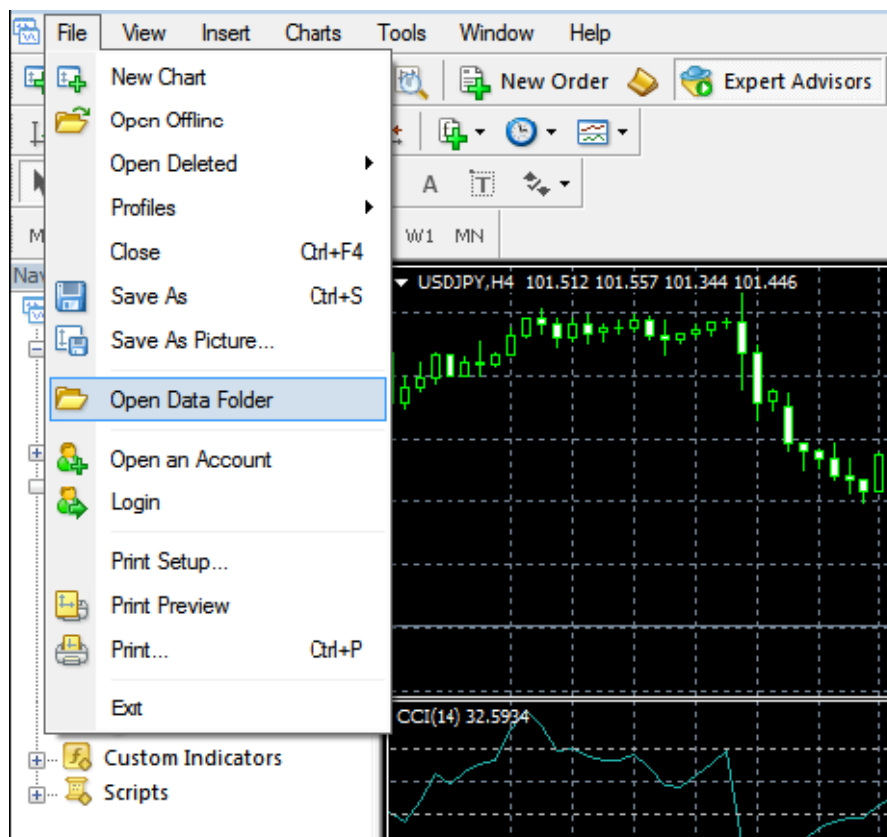

Relaunch MetaTrader 4

Short Guide on Expert Advisors installation on MetaTrader 4 Client Terminal build 600

“As a result of the recent MetaTrader 4 (MT4) Build 600 upgrade implemented by MetaQuotes, the folders within the MT4 folder have moved. In addition, the MQL4 language has changed, and this may have interfered with your installed Expert Advisors (EAs). As a result of this upgrade, you should firstly save your EAs the new folder location, which is: **“MT4 > File > Open Data Folder > MQL4 > Experts”**”

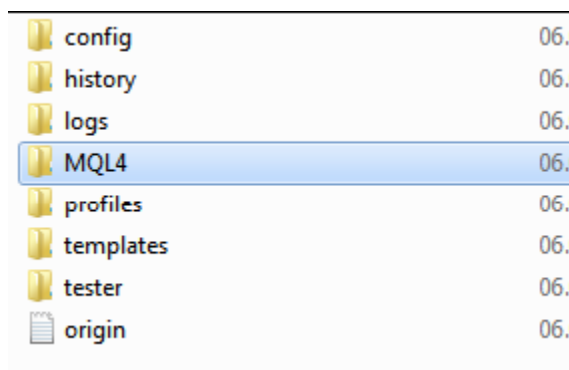

LET ME HELP YOU TO FIND THIS NEW FOLDER:

Start MetaTrader4. Select File in the menu, Open Data Folder.

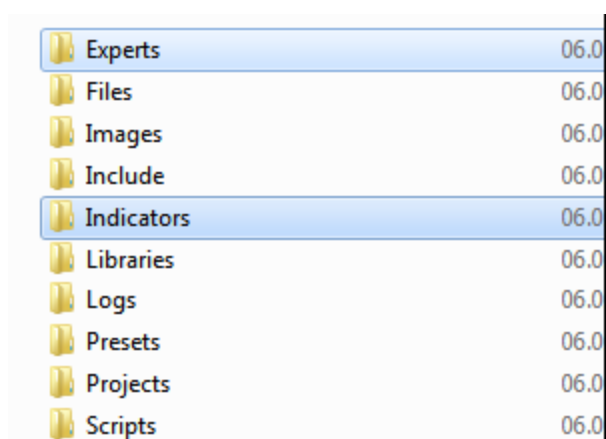

You will be in a special MT4 folder: its name may vary depending on your broker. But that's

the folders you will see:

config	06.0
history	06.0
logs	06.0
MQL4	06.0
profiles	06.0
templates	06.0
tester	06.0
origin	06.0

Now, open MQL4 folder. Here you will find **Experts** folder:

Experts	06.0
Files	06.0
Images	06.0
Include	06.0
Indicators	06.0
Libraries	06.0
Logs	06.0
Presets	06.0
Projects	06.0
Scripts	06.0

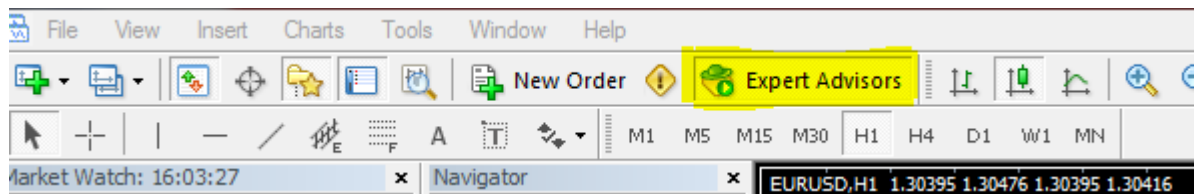

Copy and paste Samurai Robot inside **Experts** folder.

Now RESTART MetaTrader4. The files will appear under Navigator list.

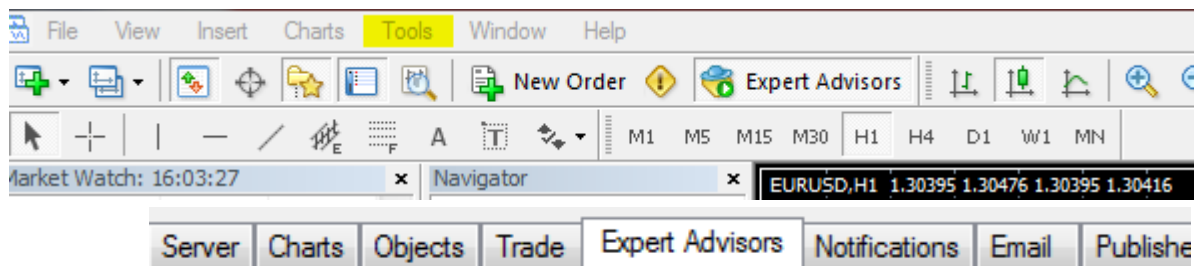

Follow this link to see video guide as well:

<http://www.youtube.com/watch?v=ScSj-RLp6Mw>

Check the settings.

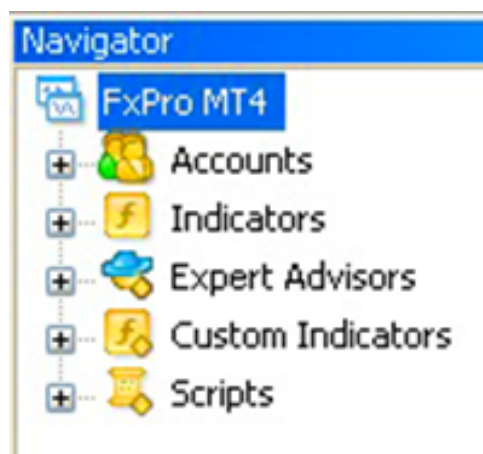

Make sure you have enabled Live Trading – it will be with the green sign as showed above and check MetaTrader Tools/Options/ Expert Advisors

- ☒ Enable Expert Advisors (except for Custom Indicators and Scripts)
 - ☒ Disable experts when the account has been changed
 - ☒ Disable experts when the profile has been changed
- ☒ Allow live trading
 - ☐ Ask manual confirmation
- ☒ Allow DLL imports
 - ☐ Confirm DLL function calls
- ☒ Allow external experts imports

Set your settings the same.

3. Now, check Navigator panel on the left of the main window.

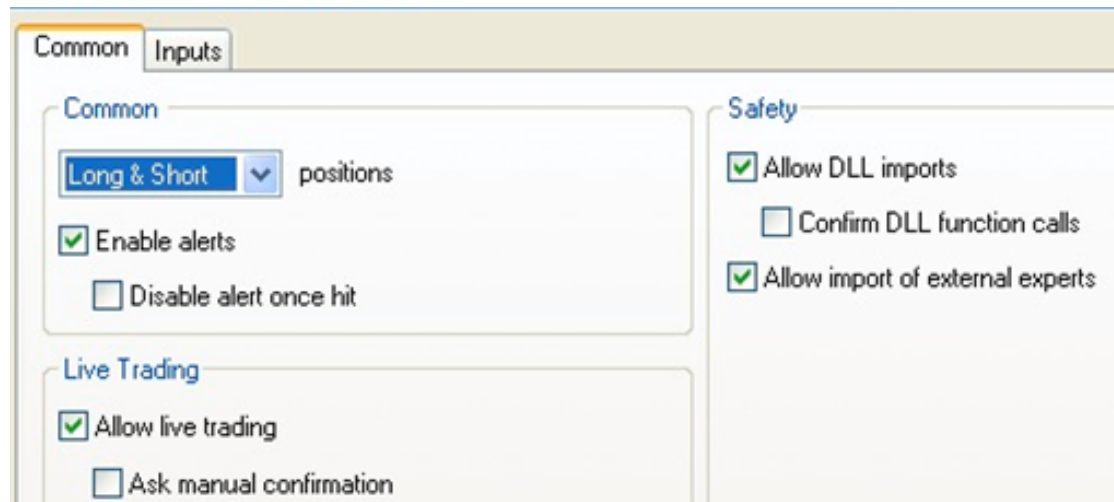

You should see **forex_samurai.ex4** under Expert Advisors in the list. If it isn't there, restart MT4 again and make sure that **forex_samurai.ex4** is in C:/Program Files/your broker/experts

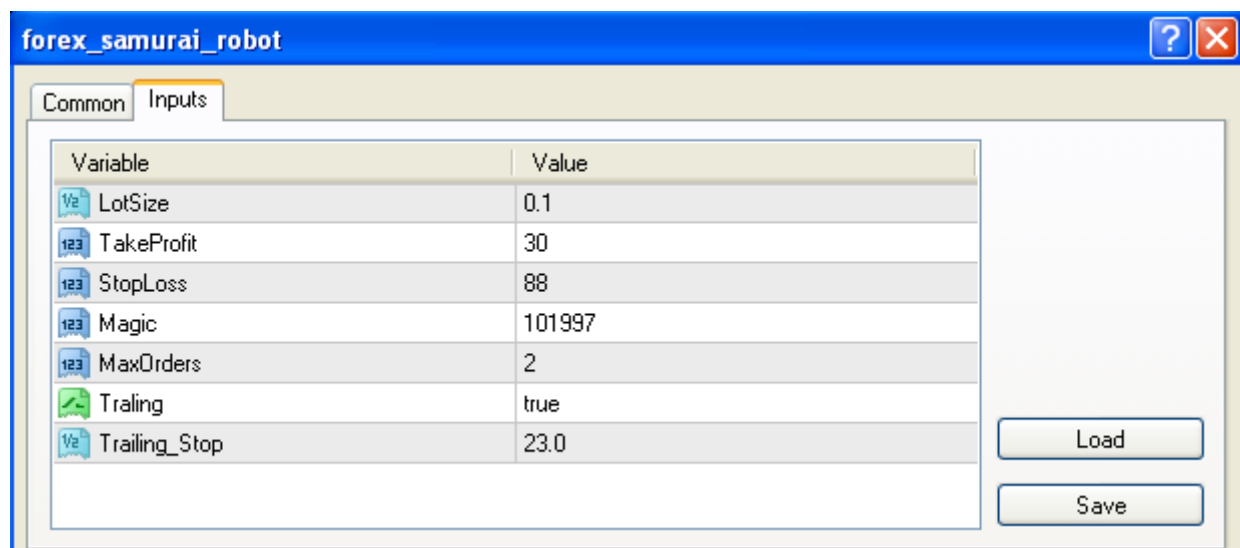

4. Open **EUR/USD**, set **H1** timeframe. It is ONLY for this pair and timeframe.

Drag and drop **forex_samurai.ex4** from Navigator panel to **EURUSD, H1** chart.

Check the settings the “**Common**” tab. Make them the same and check that you enabled Live Trading.

In the “**Inputs**” tab, you’ll find the next parameters of the robot:

Lot: Lot Size

TakeProfit: fixed take profit value of the order

StopLoss: initial stop loss value of the order

Magic - the unique number of robot, if you change it, make sure that all the robots have DIFFERENT Magic Numbers.

MaxOrders: the maximum number of simultaneous orders on this currency pair

Trailing: select “true” to enable Trailing Stop or “false” to use fixed Stop Loss

Traling_Stop: distance from profit to actual price, in points. When profit is Trailing_Stop points, a new Stop Loss would be set to make an order break even. After that, SL will be still trailed to make sure it gets more pips out of the trade.

Click **OK**

Have a great trading with Forex Samurai Robot!

If you have any questions – you may ask me directly by using my

CFTC RULE 4.41

HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

THE RISK OF LOSS IN TRADING FOREIGN EXCHANGE (FOREX) CAN BE SUBSTANTIAL. YOU SHOULD THEREFORE CAREFULLY CONSIDER WHETHER SUCH TRADING IS SUITABLE FOR YOU IN LIGHT OF YOUR FINANCIAL CONDITION. THE HIGH DEGREE OF LEVERAGE THAT IS OFTEN OBTAINABLE IN FOREX TRADING CAN WORK AGAINST YOU AS WELL AS FOR YOU. THE USE OF LEVERAGE CAN LEAD TO LARGE LOSSES AS WELL AS GAINS.
